

## GREYSTONE ROAD DETOUR COMING SOON!

### WHAT

Last September, Charlotte Water and its contractor, RH Price (construction) began construction on the South End Water Main (SWM) Improvement Project. The work began at Scaleybark Rd. and is moving north towards Worthington Ave.

The project has now progressed to your area and will require a three-week detour where Greystone Rd. intersects with South Blvd. During this time, we request that residents observe the posted traffic detours and plan your commute accordingly.

### WHERE

- No turns will be available where South Blvd. and Greystone Rd intersect.
- Available routes for detours include:
  - Hartford Ave. > Weston St. > Greystone Rd.
  - Marsh Rd. > Melbourne Ct. > Marion Pl. > Belton St. > Greystone Rd.
  - Southbound Travelers: Take Hartford Ave. to South Blvd. > Right on South Blvd. > Move to lefthand lane to U-Turn.

### WHEN

The detour will be in place for three weeks between **MONDAY, MARCH 15 – FRIDAY, APRIL 2** including overnight and weekends.

## **SOUTH END WATER MAIN (SWM) IMPROVEMENT PROJECT**

To address the needs of an aging water system in the growing South End area, and to ensure ongoing, reliable service for our customers, Charlotte Water has partnered with Stantec (engineering) and RH Price (construction) to replace the water main in South Blvd. between Scaleybark Rd. and Worthington Ave.

The construction work will be conducted in phases and began at Scaleybark Rd. and is moving north along South Blvd. The newer and much larger water main will replace an existing system that was previously installed in the 1920s and 1930s.

The project is expected to conclude Spring 2022.
